

User Creation Guide

Grove CRM · Admin Reference · Updated June 2026

OVERVIEW

Fully automated. When you create a user, the system generates a secure temporary password and emails it directly to the user. No manual password sharing needed.

STEPS TO CREATE A USER

- 1 Go to Admin Panel**
Log in as an admin and navigate to `/admin/users` from the sidebar. Only admins can access this page.
- 2 Click "Create User"**
Click the **Create User** button in the top right. The user creation form will open.
- 3 Fill in the details**
Enter the user's **Full Name**, **Email Address**, and select their **Role** (User or Admin). The password is auto-generated — you don't set it.
- 4 Click "Create User"**
The system will create the account and automatically send an invitation email to the user. The button shows "*Creating User...*" then "*Sending Invitation...*" while it works.
- 5 Done — user receives email**
A success card confirms "**Invitation email sent**". The user gets an email (see preview below) with their login credentials and a direct link to the CRM.

If email delivery fails — the success card will show an amber warning with the temporary password visible so you can share it manually.

WHAT THE USER RECEIVES

From: admin@grovesystems.co **Subject:** You've been invited to Grove CRM

Welcome to Grove CRM

Hi Ravi,

An account has been created for you on Grove CRM. Use the credentials below to log in.

EMAIL

ravi@grovesystems.co

TEMPORARY PASSWORD

Xk9#mP2qLr7!wZ4n

Log In to Grove CRM →

Important: You will be required to change this password on first login. Do not share it with anyone.

USER'S FIRST LOGIN

- 1

Click the login link in the email

Or go to the CRM URL directly and enter their email and temporary password.
- 2

Forced password change

On first login, the system immediately redirects to a **Change Password** screen. The user must set a new password before they can access anything.
- 3

Access granted

Once the password is changed, the user is logged in and can use the CRM normally.

ROLES

ROLE	WHO IT'S FOR	KEY DIFFERENCE
User	Sales team, field staff	Sees only their own quotes & leads (assigned to them or created by them)
Admin	Managers, owners	Sees everything, can delete records, manage users, assign leads

RESETTING A USER'S PASSWORD

If a user forgets their password, go to `/admin/users`, find the user in the table, and click **Reset Password**. The system will generate a new temporary password and email it to the user automatically — same flow as creation. The user must change it on next login.

Reset email comes from: admin@grovesystems.co · **Quote emails come from:** a separate quotes address — the two are kept distinct.
